BORIS MKRTICHIANI

Front-End Developer – React.js, TypeScript, Tailwind CSS

Tbilisi, Georgia | +995 597 404 981 | boka.mkrtichiani@gmail.com
github.com/Boka00 | linkedin.com/in/boris-mkrtichiani

PROFESSIONAL SUMMARY

Front-end developer building data-driven web applications and B2B SaaS interfaces such as CRMs, dashboards, and data management systems with React.js, TypeScript, and Tailwind CSS. Built a B2B CRM with Kanban and list workspaces, a KPI dashboard, and CSV export, plus a 150-question quiz platform and a countries explorer that filters 250+ records. Strong in component-based architecture, schema-driven form validation (Formik and Yup), and clean, maintainable code.

TECHNICAL SKILLS

Languages & Core: TypeScript, JavaScript (ES6+), HTML5 (Semantic Markup), CSS3, SASS / SCSS

Frameworks & Libraries: React.js (Hooks, Custom Hooks, Context API), Formik, Yup (Schema Validation)

Styling & UI Systems: Tailwind CSS, CSS Modules, Modular SCSS, Bootstrap, BEM, Responsive Design, Dark/Light Themes, Accessibility (a11y)

Data & Architecture: RESTful APIs, Feature-Based Architecture, State Normalization, Async/Await, Full CRUD, LocalStorage, CSV Export

Tools & Workflows: Git, GitHub, NPM, Vite, Agile / Scrum, AI Coding Assistants (debugging and architecture analysis)

SELECTED TECHNICAL PROJECTS

10X CRM – B2B Customer Relationship Management System

React.js, TypeScript, REST API, Tailwind CSS | github.com/Boka00

- Built a B2B CRM web application with full CRUD, integrating REST API endpoints (DummyJSON) for client and task data.
- Designed two business workspaces, a Kanban board with drag-and-drop status changes and a structured list view, with integrated call timers and multi-parameter filtering.
- Developed a dashboard that calculates operational KPIs, plus a custom CSV export and persistent Dark/Light mode.

Interactive React Master Quiz – Technical Assessment Platform

React.js, JavaScript (ES6+), CSS Modules, State Management | github.com/Boka00

- Built a 150-question technical training app with modular components, custom practice modes, and topic-based filtering.
- Implemented instant answer validation with visual feedback and persistent score tracking.

REST Countries Data Explorer – Complex Filtering Platform

React.js, JavaScript (ES6+), RESTful API, Async/Await | github.com/Boka00/rest-countries-api

- Integrated an external REST API with async/await to parse, filter, and render a dataset of 250+ countries.
- Built search and multi-criteria regional filtering with dynamic detail routing and responsive theme switching.

EDUCATION & CERTIFICATIONS

Georgian Technical University – Information Technology

10X College – Front-End Web Development, Tbilisi, Georgia

AlgoUni – Certificate of Completion, Ethical Hacking Program (2025), Certificate No. ALGO-2025-033

STEP IT Academy – Certificate of Completion, Front-End Web Programming Course (2022)
