BORIS MKRTICHIANI

Front-End Developer – React.js, TypeScript, Tailwind CSS

Tbilisi, Georgia | boka.mkrtichiani@gmail.com | boka-portfolio.vercel.app

github.com/Boka00 | linkedin.com/in/boris-mkrtichiani

PROFESSIONAL SUMMARY

Front-end developer building clean, modular B2B SaaS interfaces, CRMs, dashboards, and normalized data-management applications with React.js, TypeScript, and Tailwind CSS. Engineered a multi-workspace B2B CRM with Kanban drag-and-drop and CSV export, a schema-validated TypeScript bookmark hub, a 150-question assessment platform, and a 250+ country explorer. Backed by certified Ethical Hacking and Cybersecurity training (OWASP Top 10, CSP/XSS defense) and strong schema-driven form architecture (Formik & Yup).

TECHNICAL SKILLS

Languages & Core: TypeScript, JavaScript (ES6+), HTML5 (Semantic Markup), CSS3, SASS / SCSS

Frameworks & Validation: React.js (Hooks, Custom Hooks, Context API), Formik, Yup (Schema Validation)

Styling & UI Systems: Tailwind CSS, CSS Modules, Modular SCSS, Bootstrap, BEM, Responsive Design, Dark/Light Themes, Accessibility (WCAG AA)

Data & Architecture: RESTful APIs, Feature-Based Architecture, State Normalization, Async/Await, Full CRUD, LocalStorage, CSV Export

Security, Build & Workflow: Web Security (OWASP Top 10, XSS/CSP Hardening, Secure Headers), Git, GitHub Actions CI, Vite, NPM, Agile / Scrum

SELECTED TECHNICAL PROJECTS

10X CRM – B2B Customer Relationship Management System

React.js, TypeScript / ES6+, REST API (DummyJSON), Tailwind CSS / SCSS | github.com/Boka00/10x-CRM-Boris-Mkrtichiani

- Built a B2B CRM workspace with full CRUD lifecycle management synced with REST API endpoints for client and pipeline data.
- Engineered dual Kanban drag-and-drop and structured tabular views with integrated client call timers and multi-criteria filtering.
- Developed real-time operational KPI metrics, custom RFC-compliant CSV dataset export, and persistent Dark/Light theming.

10X Bookmark Manager – Type-Safe Knowledge & Link Workspace

React.js, TypeScript, Tailwind CSS, Formik, Yup | github.com/Boka00

- Architected a strictly typed link management hub featuring a case-insensitive tag normalization and deduplication engine.
- Implemented instant multi-parameter search, tag intersection filtering, pin/archive workflows, and Formik + Yup schema validation.

Interactive React Master Quiz – Technical Assessment Platform

React.js, JavaScript (ES6+), CSS Modules, State Management | github.com/Boka00

- Built a 150-question interactive React training engine with deterministic state transitions, topic filters, and custom study modes.
- Implemented instant Kahoot-inspired visual feedback, streak tracking, and zero-collision component styling via CSS Modules.

REST Countries Data Explorer – Geodata Filtering Platform

React.js, JavaScript (ES6+), RESTful API, Async/Await | github.com/Boka00/rest-countries-api

- Integrated an external REST API with async/await and error guards to normalize, search, and filter 250+ country profiles by region.
- Implemented interactive border-country graph navigation and high-contrast responsive Dark/Light theme switching.

EDUCATION & CERTIFICATIONS

Georgian Technical University – Information Technology, Tbilisi, Georgia

10X College – Front-End Web Development, Tbilisi, Georgia

AlgoUni – Certificate of Completion, Ethical Hacking Program (May 2025), Cert. No. ALGO-2025-033 (Outstanding Performance)

Cisco Networking Academy – Certificate of Completion, Introduction to Cybersecurity (Oct 2023, Verified Credential)

STEP IT Academy – Certificate of Completion, Front-End Web Programming Course (2022)
